WHY ANOTHER MODULE?

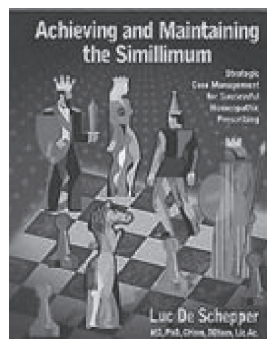

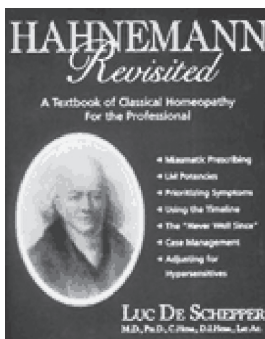

Quite simply – we all need good, practical tools to assist us with our cases! Our patients usually present with a Chief Complaint on the physical level. While we must always take the totality of symptoms into account, we will only prescribe successfully if we prescribe for the patient with a disease, and not for the disease itself.

The homeopathic case analysis process can be represented by an iceberg. The simillimum often lies buried in the unconscious of the patient – the deepest part of the iceberg. The Luc De Schepper Module guides us through that territory, helping us to identify the "Core" of the case and choose a remedy accordingly.
